Keeping up with the times

BY CHARLOTTE KNG

Keeping it exciting with innovation

Innovation is very much a part of Keppel's DNA. Over the years, we have continued to refine and improve our safety processes by applying innovations into our safety efforts, providing a safe and healthy working environment for all stakeholders.

Keeping safety at the heart of the operation

At Infinium, safety is our No. 1 priority. We comply with a structured safety system that delivers industry-leading results, but we are never complacent. Receiving this prestigious WSH Performance (Excellence) Award for the 21st straight year is an honour of which we’re all exceptionally proud.

Mr R K Jaggi, head of general management of Group Health, Safety and Environment at Keppel Corporation:

"Safety Policy, a directive requiring all vehicles transiting the site to be fitted with seat belts. During a recent internal company communication session, this was highlighted as a noteworthy work practice, by both our chemical technicians and maintenance personnel."

"I am pleased to say that compliance to work permit standards are fully met."

Winning team

Keppel Metineu took home the Smart Chemical Handling award for pre-screening chemicals and continuously elevating the risk of incompatible chemicals being loaded into the wrong tanks.

Infinium's Joint Job Site Visit ensures safe hand-offs between departments on higher risk project activities

BY HAFIZ RASID

A s world leaders in the formulation, manufacturing and marketing of petroleum additives for lubricants and fuels, Infinium prides itself on being the leading supplier and a world leader in the formulation, manufacturing and marketing of petroleum additives for lubricants and fuels.

For supervisors:

"I am pleased to say that compliance to work permit standards are fully met."

"We have come a long way in improving our HSE performance. Working so hard is not just something we say, it’s something we believe."

"Infinium has contributed to a stronger safety culture."
